PROFESSIONAL SUMMARY

Senior Web Developer & Team Lead with 8+ years of experience building high-performance, multilingual, and scalable web applications for fintech, events, real estate and e-commerce. At GTCFX (Dubai World Trade Centre) I lead full-stack development across Next.js 14, Strapi CMS, MT5/MT4 account automation, payment and card webhooks, CRM and Salesforce integrations, internal portals and regional domain architecture for 20+ country markets. I also run marketing automation across Salesforce, Klaviyo, Zapier and 5 email platforms, and use AI tools (ChatGPT, Claude, DeepSeek, Grok, AbacusAI) to speed up delivery and build chatbot agents for lead qualification and client communication.

PROFESSIONAL EXPERIENCE

GTCFX — Senior Web Developer & Team Lead

Sep 2023 – Present

Dubai World Trade Centre, UAE

Full Website Rebranding & Core Development

- Led the complete rebranding and full-stack development of the GTCFX website on Next.js 14 and Strapi CMS, owning architecture, the component library and team code reviews end-to-end.
- Built a reusable UI system with Tailwind CSS, DaisyUI, Ant Design and Headless UI, with consistent design and accessibility across all pages.
- Delivered financial dashboards with AmCharts 4, ApexCharts and Chart.js for real-time trading analytics and client reporting.

MT5/MT4 Trading & Fintech Integrations

- Integrated the MT5 and MT4 APIs to automate Live and Demo account opening, Copy Trading setup and client portal onboarding through secure server-side webhooks.
- Built and maintain webhook integrations that automate GTC Credit Card activation.

- Added CSV, Excel and print-ready exports of client trading reports using react-csv, xlsx and react-to-print.
- Connected MSSQL Server for trading data storage and retrieval through secure Next.js API routes.

CRM, API & Automation Integrations

- Connected the Salesforce API and the CRM API to the website for lead capture, lead status tracking and automated flows via Salesforce Marketing Cloud.
- Built and manage the lead-handling mechanism that captures leads from Meta, Google and TikTok campaigns and passes them automatically into Salesforce, so Sales can follow up without manual entry.
- Built Zapier automation pipelines that route form submissions, leads and events between tools and departments with zero manual handling.
- Built a multi-provider communication stack with SendGrid, Mailgun and Nodemailer (email) and Twilio (SMS) for OTP verification and transactional notifications.

Internal Portals & Tools

- Designed and built a dynamic QR code portal that creates and manages QR codes.
- Designed and built a dynamic employee portal for internal use.

Email Marketing & Client Communication

- Run email marketing automation across Mailchimp, Klaviyo, Brevo, SendPulse and GetResponse for campaigns, maintenance updates and behavioral flows.
- Built automated server-down email notifications that alert clients during outages and updates.
- Built dynamic HTML email templates that personalise content for each client, optimised for Primary inbox placement.
- Configured SPF, DKIM and DMARC on branded domains for email deliverability.

Regional Domain Strategy & Infrastructure

- Architected IP-based regional detection and redirect routing users to the correct country domain across 20+ markets, with backup domain failover where FX trading is restricted.
- Manage hosting and infrastructure across AWS EC2, Vercel, SiteGround, GoDaddy, Cloudflare and AliCloud, covering SSL, DNS, CDN caching and CI/CD pipelines.
- Maintain Lighthouse targets (LCP < 2s, INP < 200ms) with WebP/AVIF images, code-splitting and dynamic imports.

Analytics, Tracking & SEO

- Set up and manage Google Analytics 4 tracking for the website, including event and conversion tracking across forms, sign-ups and portal journeys.
- Configure and maintain tags, triggers and variables in Google Tag Manager, including GA4 and Facebook Pixel tags.
- Use Google Search Console to submit sitemaps, monitor indexing and search performance, and fix SEO issues across regional domains, with hreflang, canonical tags and schema markup.

AI Tools, Chatbot Agents & Security

- Deployed AI-powered chatbot agents for client communication, lead qualification and intelligent handoff to Sales and Support teams.
- Implemented reCAPTCHA, OTP/email verification, honeypot anti-spam, DOMPurify XSS sanitization and Formik/Yup validation across all forms and auth flows.

Platinum UAE — Senior Web Developer

Sep 2022 – Aug 2023

Dubai, UAE

- Owned the full web stack for a group of multi-brand websites and online shopping portals, managing end-to-end development and deployment.
- Built and maintained Shopify and WooCommerce stores with multi-currency, VAT, shipping zones, coupons and gateways such as Stripe, PayPal, PayFort and Telr.
- Ran A/B tests and UX improvements on product, detail and checkout pages using GA4 and heatmap data to improve conversion.
- Managed country domains, subdomains, SSL, CDN caching (Cloudflare, CloudFront) and DNS; added structured data, XML sitemaps and Meta, TikTok and Snap pixels.

- Set up SPF, DKIM and DMARC and ran transactional and marketing flows in Klaviyo and Mailchimp.
- Maintained Git flow with PR reviews and staging-to-production deployments on Vercel and AWS EC2, with uptime monitoring and automated backups.

Harbor Real Estate — Senior Website Developer
Apr 2021 – Aug 2022

Dubai, UAE

- Built multilingual WordPress sites with WPML, custom booking systems with time slots and online payment, and custom themes and plugins for high-traffic sites.
- Integrated live property XML/JSON feeds to portals including Dubizzle and Bayut for real-time listing synchronization.
- Ran email and SMS marketing databases and campaigns; integrated Facebook, Snapchat and TikTok lead-generation APIs.
- Improved page speed on high-traffic listing pages with lazy loading, image compression and caching.
- Delivered landing pages and lead collection portals on schedule with design and marketing teams.

Wolfiz Pvt. Ltd. — Shopify & WordPress Developer
Oct 2017 – Mar 2021

Islamabad, Pakistan

- Designed and built 200+ custom Shopify and WordPress websites for international clients from scratch, with multilingual and multi-currency storefronts.
- Built WooCommerce customizations including subscription products, offer logic and payment gateway integrations, plus PHP/HTML landing pages and microsites.
- Ensured cross-browser and multi-device compatibility through performance tuning and QA on every project.

Self-Employed — Freelance Web Developer
2016 – 2017

Rawalpindi, Pakistan

- Delivered WordPress, custom HTML/CSS and small e-commerce projects for local and international clients while upskilling in modern JavaScript frameworks.

Webmekanics Pvt. Ltd. — Frontend Developer
2015 – 2016

Rawalpindi, Pakistan

- Built responsive UIs with HTML5, CSS3, Bootstrap and JavaScript (AngularJS) across the full SDLC.
- Ensured performance on desktop and mobile; wrote test cases and maintained documentation.

EDUCATION

BSc in Software Engineering
2011 – 2015

University of Engineering & Technology (UET) Taxila, Pakistan

CERTIFICATIONS & CONTINUOUS LEARNING

• Next.js & React Advanced Development — Udemy
• Salesforce Marketing Cloud — Trailhead (Salesforce)
• AWS Cloud Practitioner Essentials — AWS Training
• AI Tools & Prompt Engineering — Continuous self-development (ChatGPT, Claude, DeepSeek, Grok, AbacusAI)
